by Chikn

Eggnite is the world's first upgradable NFT launchpad

We work with new and existing projects to make static NFTs **dynamic** and then launch them to **the world's largest upgradable NFT community.**

Whether you're looking to launch an NFT project, migrate an existing collection, release a Web3.0 game, create a gamified loyalty program, or leverage NFTs in any other way,

Eggnite is for you.

Eggnite lets you

How?

With the power of **\$EGG**

Who Are We?

We are **Chikn™**

Our ecosystem encompasses three of the top NFTs on Avalanche, including its biggest collection **of all time: chikn.**

- We're home to the largest and most active community on Avalanche.
- Our novel Tri-Token Architecture pioneered Upgradable NFTs.
- Our ecosystem is an infinitely expanding metaverse, capable of hosting endless NFTs, Play-to-Earn/ Play-to-Own games, and upgradable innovations both within and alongside it.

Proudly built on Avalanche, we plan to migrate our ecosystem to our own subnet: **The Bokchain.**

The Bokchain is powered by our custom gas token, **\$EGG**. This is the same token utilized by **Eggnite** and the most transacted token on Avalanche besides AVAX itself.

As the leading NFT project on Avalanche, we plan to bootstrap over \$1 billion of gamified NFTs onto low-cost, high-speed infrastructure through **Eggnite**.

Want to get Involved?

This **Google Form** is the first step in your application to Eggnite.

Whether you're just starting or have already launched, we want to hear from you. Show us what you have—the idea, the art, the website, the docs, the team, the concept, or your track record—and let's get the conversation started.

Complete the Form above and we will get back to you as soon as possible.

Repeat submissions will not be considered.

What We're Looking For

Creativity & Originality

Like you, we believe in doing things differently. While we do want cohesion in the Chikn ecosystem, we also want a breadth of concepts, genres, and technical applications. Mix it up and make it fresh—this is your permission to innovate.

Quality & Suitability

Is it capable of becoming a top-10 project on Avalanche? Could it be competitive with top-tier NFTs on Ethereum?

Enjoyment Factor

Will the community love it? Interactivity, playability, and utility are the keywords here. It might look pretty, but is it fun?

Progress

How far along are you? How much extra work needs to be put in or are you on track for completion in the near future?

Proof of Execution

What's your track record? Proven ability to execute is not essential, but a massive plus.

Transparency & Compliance

While we're not here to micromanage, we're serious about due diligence and need to be sure you're a trustworthy and legally compliant entity within your jurisdiction.

Let us make your NFT
vision a reality.
